

“Hospital water systems are the source of infections caused by Legionella, Pseudomonas and antibiotic-resistant Stenotrophomonas. Purify the water and you will stop the infections.”

Janet E. Stout, Ph.D., Director  
Special Pathogens Laboratory

Nephros Dual Stage  
Ultra Water Filter (DSU)  
eliminates waterborne  
pathogens.

Eliminate waterborne pathogens and ensure the safety of your immuno-compromised and at-risk patients with Nephros Dual Stage Ultrafilters. Easy to install and cost effective, the Dual Stage Ultrafilter contains a 0.005 micron membrane to eliminate bacteria, viral agents, cysts, fungi and biological endotoxins. **The result: Biologically safe water.**

For more information, **visit [nephros.com](http://nephros.com)**. Or to discover how safe your facility's water can be, order a **Nephros Mitigation Kit**. Call us at **212-781-5113**.
