

Patient Safe™ Syringe

SYRINGES
DESIGNED TO
PROTECT PATIENTS

Patient Safe™ syringes are uniquely designed to reduce the risk of bloodstream infections resulting from catheter hub contamination

Patient Safe™ Syringes do not transfer contaminants to luer-activated valves or patients

Standard syringes transfer contaminants to luer-activated valves and intravenous fluid

Unique luer guard reduces the risk of luer tip contact contamination.

Compatible with most available hypodermic needles, including those with manually activated safety features, vial access devices, and luer-activated catheter hubs.

Reduces the risk of medication contamination.
